

UPDATE - 4-8-2020 - Dr. Chris and I have just finished our second week working under our new hours. It has been tough, but very rewarding working on patients that require care. As difficult as it is, we have extended our condensed schedule until at least May 4th to align with Governor Baker's schedule. Even though we are essential and could have full hours, Diane and I thought it best for all, to condense hours and limit ours and your risk. We will see as many patients as we can during those hours to ensure that you, our patients, can be fully functional and work in our current reality. Our biggest complaint this week was working from home in an environment not set up for it. With that said, please take a look at your workspace and see if you can make it a little better. Raise up your monitor some, see if you can find somewhere to stand and work for an hour, and above all else get up for a few minutes every hour and walk around.

Again, all regularly schedule visits have been removed. If you need an adjustment, please call the office at 508-384-0944 and we will get you on for an upcoming available appointment.

Thank you and keep on doing what you are doing to stay well!
